

A network for labeling professionals, focused on developing best practices for End-to-End labeling compliance, enhancing operational efficiency and excellence, and creating value-adding labeling

Recent topics discussed at labelnet?

- **The Company Core Datasheet (CCDS) is an essential document for global labeling management**, particularly in upholding labeling consistencies across diverse markets. Clearly defined processes for the creation, update and version management of the CCDS, alongside a clear policy for regional/local implementation, is required to ensure that accurate and consistent benefit-risk information is communicated to the end-users in an effective and timely manner
- **The need to have End-to-End labeling oversight is now a regulatory expectation** and no longer just a future requirement. End-to-End tracking of status and timelines is an essential part of End-to-End labeling oversight i.e. from confirmation of safety signal to labeling implementation 'in pack'
- **Effective management and governance of local labeling deviations drive global consistency of messages** and provide oversight and assurance of labeling compliance in the global operating environment
- **A proactive labeling intelligence strategy** is becoming increasingly important in enabling companies to adapt and respond to the rapidly changing regulatory environment and the growing presence and importance of emerging markets
- **The focus for labeling is shifting from simply 'staying compliant' to improving operational efficiency and adding value** via deployment of new technologies tailored to the needs of labeling, new paradigms in managing product information/labeling content (e.g. structured content, IDMP), smart applications of labeling (e.g. eLabeling)

What is labelnet?

- Established in 2011, **labelnet** provides an open yet confidential platform to network, share insights and experiences, benchmark performance and develop best practices across the full lifecycle of labeling. Discuss subjects from the definition of company positions (CCDS, CCSI) to local and regional labeling (SmPC, USPI, Reference Labeling, Local Labeling Deviations Management, etc.) that ultimately lead to labeling implementation for patient/product leaflets, artwork, packaging, and electronic media and other product information in the public domain for which the Marketing Authorization Holder is ultimately accountable
- In light of the increasingly pivotal role labeling plays in improving patient safety and, as a key channel for Benefit-Risk communications together with the increasing emphasis regulators place on labeling as an integral part of a PV system, we aim to develop compelling yet practical solutions to meet ever shifting regulatory requirements, whilst providing business value and meeting the needs of patients and prescribers
- Objectives include: peer-to-peer networking and insight exchange; discuss and develop strategies and best practices, build profile and industry voice focus on member interests, with agreement to confidentiality

Who should join labelnet?

- Heads of Labeling and Labeling Professionals

Why join labelnet?

- Future proof your labeling system, engage with global peers, compare and improve your performance
- Be part of the only global labeling network with exclusive access to:
 - Spring and autumn in person meetings in US and Europe; industry leading insights with a strategic focus
 - Technology showcase events driven by member cases to discover cutting edge utilizations of technology, new approaches and collaborations
 - Annual benchmark, with 1-1 meetings to explore insights, relative performance and improvement opportunities
 - Hot topic based industry working groups, think tanks and webcasts
 - Live scientific community discussion board: connect with other members, post and answer questions on latest labeling topics
 - Member-only platform for collaboration and resource hub – a secure portal to connect and collaborate with peers and share the latest documented insights
 - Routine publications including white papers, benchmark report, discussion summaries
 - Unique networking with access to Subject Matter Experts within Navitas Life Sciences

Upcoming Meeting Dates for 2018

labelnet Forums:

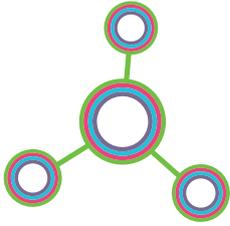

- **Spring**
 - 6-7 June in London
 - 13-14 June in New York

Webcasts:

Who to contact

- For more information about **labelnet**, please contact labelnet@navitaslifesciences.com

At Navitas Life Sciences, we are proud of our portfolio of industry leading networks. Aimed at pharmaceutical industry professionals, our networks were founded as an independent community for business leaders facing similar challenges to have a peer network to exchange insights, compare performance, and debate strategies to tackle the latest hot issues. Each network has a focused and evolving agenda to meet the latest challenges.

Family of Networks

The forum and community is the place to discuss trends, insights and future solutions. The objectives of the network include:

- Peer to peer networking and insight exchange
- Discuss and develop strategies and best practices
- Build profile and industry voice
- Focus on member interests
- Agreement to confidentiality
