

A network for Heads of Information Technology for PV departments, focused on increasing business value from technology investments

What topics are discussed at pvtech?

Recent topics include:

The shifting regulatory, industry and technology context

- Emerging regulatory shifts and new standards e.g IDMP, EV, E2B(R3), GDPR
- PV transformation - latest innovations, levers, impact and the role of technology
- The wider technology landscape - what is new, and so what for PV?

Global markets and PV technology

- Case management and oversight with Affiliates and partners
- Deployment of apps for PV
- Overcoming the technology challenges during M&A

Digital tools & technology as a PV game changer

- Applications of cognitive computing in PV for advanced automation
- Navigating value-creation in a multi-sourced, real-world data setting
- Expanding horizons for PV: delivering analytics insights across the organization and to patients
- mHealth / IoT

Showcase of industry pilots with provocative new technologies and industry collaborations

- New PV insights leveraging AI, machine learning and cognitive computing
- Search capability and social media scanning - how to pinpoint and connect information that is relevant for PV; Natural Language Processing for unstructured text
- Process Orchestration - new ways to facilitate PV workflow, rules, and decisions; BPM for signal management
- Data Assets and Insights - what is out there and what can help extract insight from data; interactive visualization tools
- Technology collaborations - utilizing a shared investigator platform
- Patient facing technologies - PV Mobile App, use of Wearables

What is pvtech?

- The role of technology is playing an increasingly important role in PV, rapid technological advances are affording the opportunity to transform the very essence of how PV operates. **pvtech** is the joint **pvnet** and **pvconnect** interest group for individuals responsible for enabling and supporting PV technologies in their organizations
- Our vision is to shape the future of technology in Pharmacovigilance by providing business and technology leaders with an open environment to share challenges, but also discuss alternative solutions and develop best practices that are aligned to the future of Pharmacovigilance whilst increasing business value from their technology investments
- Objectives include: Peer to peer network and insight exchange; discuss and develop strategies and best practices; build profile and industry voice; focus on member interests; with agreement to confidentiality

Who should join pvtech?

- Individuals responsible for enabling and supporting PV technologies in their organizations

Why join pvtech?

- Future proof your PV system, engage with global peers, compare and improve your performance
- Be part of the only global PV network with exclusive access to:
 - Spring and autumn in person meetings in US and Europe; industry leading insights with a strategic focus
 - Technology showcase events driven by member cases to discover cutting edge utilizations of technology, new approaches and collaborations
 - Annual benchmark, with 1-1 meetings to explore insights, relative performance and improvement opportunities
 - Hot topic based industry working groups, think tanks and webcasts
 - Live scientific community discussion board: connect with other members, post and answer questions on latest PV technology topics
 - Member-only platform for collaboration and resource hub - a secure portal to connect and collaborate with peers and share the latest documented insights
 - Routine publications including white papers, benchmark report, discussion summaries
 - Unique networking with access to Subject Matter Experts within Navitas Life Sciences

Upcoming Meeting Dates for 2018

Who to contact

- The network is exclusively for **pvnet** and **pvconnect** members. For further information, or to register your interest, please contact us at pvtech@navitalifesciences.com

At Navitas Life Sciences, we are proud of our portfolio of industry leading networks. Aimed at pharmaceutical industry professionals, our networks were founded as an independent community for business leaders facing similar challenges to have a peer network to exchange insights, compare performance, and debate strategies to tackle the latest hot issues. Each network has a focused and evolving agenda to meet the latest challenges.

Family of Networks

The forum and community is the place to discuss trends, insights and future solutions. The objectives of the network include:

- Peer to peer networking and insight exchange
- Discuss and develop strategies and best practices
- Build profile and industry voice
- Focus on member interests
- Agreement to confidentiality
