

## How do I effectively automate my PV activities?

### Benefits

- Achieve more with your existing team through streamlined processes and systems
- Maximize value from existing technology investments
- Enable improved visibility and compliance across functions
- Future-readiness to support company growth and meet evolving regulatory requirements

### PV continues to face challenges in an environment of static headcount compounded by a scarcity of capable resources

- ICSR volumes continue to increase
- Changing regulatory requirements result in additional workload – e.g., EudraVigilance 8.0
- Emerging GVP-like requirements around the world require similar but different documents for submission to local regulators
- Difficulty in achieving robust oversight with information scattered across systems and across functions

### Navitas Life Sciences provides an integrated approach leading to impactful results

- Survey of technology landscape to understand IT systems, level of integration, and identify functionality that could be used to automate PV processes
- Leverage best practices from our industry networks **pvnet** / **pvconnect** / **pvtech**
- Explore how technologies such as cognitive computing can be piloted to achieve further efficiency gains

### Deliverables

- Comprehensive assessment report summarizing current state PV technology benchmarked against industry best practices
- Recommendations and Technology Roadmap to achieving a compliant, high-performing PV System
- IT Business Case for senior management describing near-term and long-term benefits from implementing the Technology Roadmap

### About Navitas Life Sciences

As a partner for the industry, Navitas Life Sciences leverages industry insights, consulting and technology capabilities to deliver full service clinical, regulatory and safety solutions and desired outcomes to clients. As the dedicated life sciences brand of TAKE Solutions, Navitas harnesses the combined knowledge and experience of three legacy brands—Ecron Acunova, Navitas, and Intelnet—to provide end-to-end services and solutions. Navitas helps clients address their most critical problems by bringing together the capabilities of a full-service CRO, a technology-led life sciences services provider across clinical, regulatory and safety, and a life sciences big data services and analytics provider. Operating from 7 countries across the globe, Navitas works with over 150 customers in Life Sciences.
