

Are you making data driven decisions in real time?

Benefits

- Data driven decision making is possible with a focus on the things that matter in real time
- Quality tolerance limits can be applied, creating better visibility to risks
- Robust processes defined for aggregating, processing and managing data and information
- Technology to support is optimized, with overlaps, synergies and processes defined with other technology in use
- Introduction of a flexible method to integrate data from any source, even under changing circumstances

A typical phase 3 trial now generates 900,000 data points, usually captured in silo-ed systems. As a result:

- Companies struggle to maintain visibility of all information across multiple, silo-ed data sources and systems
- Consolidating data takes time, thereby limiting the opportunity for real time clinical decision making
- Quality tolerance limits are rarely implemented, leading to poor understanding of data and non-compliance with the ICH GCP R2 Addendum

Navitas Life Sciences provides an integrated approach leading to impactful results

- **Mapping of technology systems** to produce a data flow map
- **Define strategy** from current situation to a unified model of data and information management
- **Support from therapeutic experts** that provides actionable insights into data solutions

Deliverables

- **Analysis of current processes**, technology and governance framework
- **Summary of interview findings**
- **Roadmap** for data unification success with implementation plan
- **Data management and communication plans**
- **Business case to senior management** on strategy for successful implementation

About Navitas Life Sciences

As a partner for the industry, Navitas Life Sciences leverages industry insights, consulting and technology capabilities to deliver full service clinical, regulatory and safety solutions and desired outcomes to clients. As the dedicated life sciences brand of TAKE Solutions, Navitas harnesses the combined knowledge and experience of three legacy brands—Ecron Acunova, Navitas, and Intelent—to provide end-to-end services and solutions. Navitas helps clients address their most critical problems by bringing together the capabilities of a full-service CRO, a technology-led life sciences services provider across clinical, regulatory and safety, and a life sciences big data services and analytics provider. Operating from 7 countries across the globe, Navitas works with over 150 customers in Life Sciences.
