

## Are your clinical operations organized to optimize RBM?

### Benefits

- Streamlined data to define site monitoring activities
- Realignment of roles and responsibilities to core needs
- Cost reduction by off-shoring non-core activities
- Potential integration of selected data monitoring activities with CDM activities for improved outcomes
- More effective analytics and relationship driven site management strategy

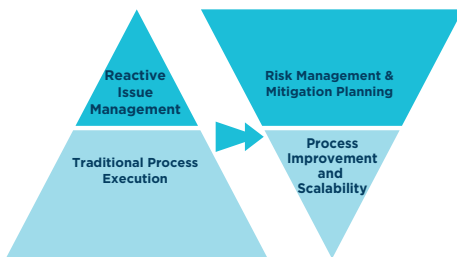

**Current processes in clinical operations generate high cost but often add little value. Efficiency gains can be made in the following areas:**

- R&D operations, including the real time availability of data for informed decision making
- Seamless and coordinated trial operations, including on-time patient recruitment and delivery of drugs to site
- Quality by design, to ensure processes and outcomes are “right first time”
- Compliance with ever changing regulations, including submissions expertise
- High cost of drug development and the need to improve efficiency in all clinical functional areas

**Navitas Life Sciences provides an integrated approach leading to impactful results**

- Therapeutic area experts** provide relevant insights for integration of proactive quality planning steps into your SOPs, governance structure and study operations
- Industry leading technologists with RBM expertise** to assess systems architecture and data flow, capabilities, data governance, challenges and quality roadmap
- Resource capacity and capability assessment tools** that clarify gaps and options in relation to best practice RBM model

**Transformation, not evolution, through improvements in People | Process | Technology**

### Deliverables

- Current core vs non-core capabilities and capacity**
- Current systems map and data flow schema**
- Process and governance gap analysis**
- Standardized tools and templates for core activities**
- Transformation roadmap with change management plan**
- Case for change for senior management and use in building alignment of stakeholders**

### About Navitas Life Sciences

As a partner for the industry, Navitas Life Sciences leverages industry insights, consulting and technology capabilities to deliver full service clinical, regulatory and safety solutions and desired outcomes to clients. As the dedicated life sciences brand of TAKE Solutions, Navitas harnesses the combined knowledge and experience of three legacy brands—Ecron Acunova, Navitas, and Intelent—to provide end-to-end services and solutions. Navitas helps clients address their most critical problems by bringing together the capabilities of a full-service CRO, a technology-led life sciences services provider across clinical, regulatory and safety, and a life sciences big data services and analytics provider. Operating from 7 countries across the globe, Navitas works with over 150 customers in Life Sciences.

A TAKE Solutions Enterprise
